## Report on Induction Programme

22.11.2020

Transition from school to college life is one of the most challenging events in a students' life. When new students enter an institution, they come with diverse thoughts, backgrounds and preparations. They come into a new unfamiliar environment, and many of them have little knowledge of a university/college. An important task, therefore, is to welcome new students to Higher Education and prepare them for their new role.

Thus our Autonomous Institution planned to conduct an Induction program to the first year students of the academic year 2020-2021. The term induction is generally used to describe the whole process whereby the incumbent adjust to or acclimatize to their new roles and environment. In other words, it is a well planned event to educate the new entrants about the environment in a particular institution, and connect them with the people in it. Student Induction Programme engages with the new students as soon as they come into the institution; before regular classes start. At the start of the induction, the incumbents learn about the institutional policies, processes, practices, culture and values, and their mentor groups are formed.

As per the direction of the management, our Autonomous Institution proposes an 8 days Induction program for the first year students entering into our institution in the academic year 2020-2021. Academic classes start only after the induction program is over.

The purpose of conducting Induction Program is to make the students feel comfortable in their new environment, open them up, set a healthy daily routine, create bonding in the batch as well as between faculty and students, develop awareness, sensitivity and understanding of the self, people around them, society at large, and nature. The time during the Induction Program is also used to rectify some critical lacunas, for example, English background, for those students who have deficiency in it.

The following activities are carried out during the induction program for the benefit of the first year students those who have admitted in the academic year 2020-2021. The students are divided into Batch 1, Batch 2, Batch 3 and the students were fully engaged throughout the day for the entire duration of the program:
