

SENGUNTHAR ENGINEERING COLLEGE

(AUTONOMOUS)

(Approved by AICTE, New Delhi & Affiliated to Anna University, Chennai)
Recognized Under Section 2(f) & 12(B) of the UGC Act, 1956
NAAC Accredited with 'A' Grade

TIRUCHENGODE - 637 205 NAMAKKAL (Dt) TAMILNADU

Ref: SEC/Financial Support/Conference Participation /2020-2021/01

Date: 10.03.2021.

Submitted to the Correspondent for Approval:

Sir,

Sub: Requesting permission for accord financial assistance to present the papers in the National / International Conference - Reg.

We would like to bring to your kind consideration that we are in need of financial assistance to present the papers in the National / International Conference. Further, we kindly request you to accord permission to sanction the amount of Rs.500/- per article towards the presentation fee.

The Department wise amount detail is listed below for your kind perusal:

S.No.	Department	No. of Articles	Amount Required	Total Amount (in Rs.)
1	Civil Engineering	13	6500	32,500/-
2	Computer Science and Engineering	14	7000	
3	Electronics and Communication Engineering	16	8000	
4	Electrical and Electronics Engineering	9	4500	
5	Mechanical Engineering	13	6500

AN AUTOMATED COVID-19 FACEMASK DETECTION WITH DEEP LEARNING

Dr.S.Radha M.E.,Ph.D¹, M.Durgadevi², M.Vijayalakshmi³,

R.Subakeerthana⁴

¹*Assistant Professor/CSE,*

^{2,3,4}*Dept.of.CSE, SEC.*

ABSTRACT

The COVID-19 pandemic is causing a worldwide wellbeing emergency so the successful security strategies is wearing a face veil in open regions as indicated by the World Health Organization (WHO). The COVID-19 pandemic constrained governments across the world to force lockdowns to forestall infection transmissions. Reports show that wearing face veils while at work unmistakably diminishes the danger of transmission. A proficient and monetary methodology of utilizing AI to establish a protected climate in an assembling arrangement. A mixture model utilizing profound and traditional AI for face cover discovery will be introduced. A face veil identification dataset comprises cover and without cover pictures , we will utilize OpenCV to do continuous face location from a live stream through our webcam. To utilize the dataset to assemble a COVID-19 face veil indicator with PC vision utilizing Python, OpenCV, and TensorFlow and Keras. We will probably recognize whether the individual on video transfer is wearing a face cover or not with the assistance of PC vision and (RCNN) profound learning

DETECTING AND TRACKING MENTAL ILLNESS ON SOCIAL NETWORKS BY USING SVM

**Dr.B.Sujatha^[1], L.Manivannan^[2], K.Mohan^[3], A.Sakthivel^[4],
G.Vigneshwaran^[5]**

*¹Professor , Department of Computer Science and Engineering,
Sengunthar Engineering College(Autonomous),India*

*^{2,3,4,5}Final Year, Department of Computer Science and Engineering,
Sengunthar Engineering College (Autonomous),, India*

ABSTRACT

Although rates of diagnosing mental illness have improved over the past few decades, many cases remain undetected. Symptoms associated with mental illness are observable on Twitter, Facebook, and web forums, and automated methods are increasingly able to detect depression and other mental illnesses. In this paper, recent studies that aimed to predict mental illness using social media are reviewed. Mentally ill users have been identified using screening surveys, their public sharing of a diagnosis on Twitter, or by their membership in an online forum, and they were distinguishable from control users by patterns in their language and online activity. Automated detection methods may help to identify depressed or otherwise at risk individuals through the large-scale passive monitoring of social media, and in the future may complement existing screening procedures.

PREVENTION OF PORT FORWARDING AND PRIVILEGE ESCALATION

Mrs. J.Mythili M.E.,K.Arun Prasanth , R.J Dharsun,

R.Dhinakaran, N.Gowtham

Assistant Professor/CSE, Dept.of.CSE,

*Department of Computer Science and Engineering, Sengunthar Engineering College
(AUTONOMOUS).*

ABSTRACT

A privilege escalation in the Linux system can be defined as a method of gaining access to the kernel system and allowing the user to have an administrative access to the local admin account system on the computer. This problem describes the of concept attack scheme using Dynamic port forwarding. The attack scheme, the same interaction on the physical access to the computer system could be accomplished by the attacker using a little effort specialized Port vulnerability to take over the computer system in full where it will collect valuable information,to avoid that through IP block and Preventing Port vulnerability.To preventing like user-friendly python programming language to run check and resolve the problem.

Privileges describe what a user is permitted to do such as viewing files, modifying or deleting data. Privilege escalation takes place when a user gets access to more resources or services than they are normally allowed to perform unauthorized actions. It attacks the main kernal OS of the Computer system like as a user to escalate the admin permission.

Keywords: Privilege escalation, Port ,vulnerability

Optima Web Application Development using Angular JS

Dr. M. Sakthivel¹, V. Naveen²

¹ *Associate Professor-Sengunthar Engineering College(Autonomous) ,Tamilnadu.*

² *ME-CSE 2ndYear-Sengunthar Engineering College(Autonomous) ,Tamilnadu.*

ABSTRACT

Optima ("PROPOSAL DOCUMENT FOR OPTIMAL ENHANCEMENT DEVELOPMENT") is one of the five important scientific research project funded by the Italian space to study of the application the information of the imaging spectrometer. And the panchromatic camera of the prisma mission. One of the main tax of the project is the implementation of advance autonomous techniques for radiometric calibration and atmospheric correction. Using of coding web page application. Proposal_MSPL_optima_Enhancement , the using of project programming are HTML, CSS, JS, BOOTSTRAP, ANGULAR JS. The design of the job card will be mutually discussed and approved. in this method we used in working for company project schedules system. Olympus required to enhance the functionality of Optima portal in Reference to Requirements for Optima 2.0 Upgrade document, the scope and deliverables planned and details in the document. The performance of the software in terms of its response time whiling Check-in, while clicking on various workflow
